FinnRelax	FinnPlus	FinnSlim	Finnamic	FinnStretch	Prevention Shoes	FinnOrtho	FinnMellow

THE RIGHT STANCE

Our physical wellbeing is very dependent on how well our feet are supported. The correct support affects more than just our posture and gait; it influences our whole body. This means that unique development and production techniques are required for all different types of feet. A key part of our work at FinnComfort® is to look in detail at different types of feet and to develop shoes that fit perfectly and feel great. Therefore, we are always guided by the needs of our customers and continuously work to improve all our products.

FINNSLIM

EXTRA-NARROW FIT

The extra narrow cut pampers delicate feet through optimal comfort. These models are suitable for those who walk on narrow feet.

The narrow cut of the shoe and footbed offers an optimal fit and foothold – so even dainty feet can walk safely and comfortably.

FINNSOFT

SOME LIKE IT SOFT

WITH THE FINNCOMFORT® SOFT FOOTBED

The soft footbed, a cushioned, super comfortable footbed, features an extra layer of foam. This long lasting material consisting of resilient memory foam promises a very soft step.

It is ideal for sensitive feet because the entire body weight is gently absorbed at every step.

FINNRELAX

OUT AND ABOUT IN COMFORT

These models are impressive for the remarkably light weight of their outsole. The lightness is achieved through the "EVA" material, with millions of tiny air chambers. The excellent cushioning guarantees extraordinary walking pleasure with each step.

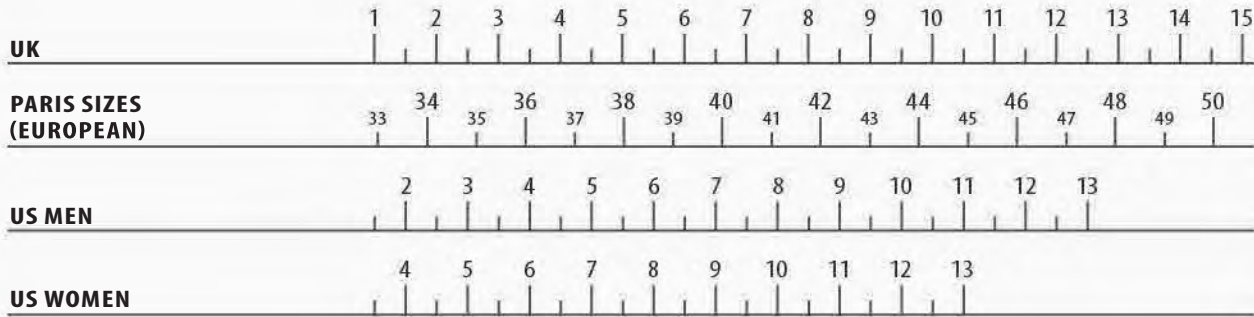

FINNSTRETCH

FOR PARTICULARLY SENSITIVE FEET

Soft materials, shock absorbing outsoles and a padded footbed let you stand and walk comfortably and can help meet your special orthopaedic needs. Special consideration is given to the needs of those suffering from arthritis and diabetes. For example, the shoes offer plenty of room for the toes. The width of the forefoot is generously cut and the hold of the heel is very secure, ensuring optimal guidance for your foot.

COMPARATIVE SHOE SIZES

FINNAMIC

WALK COMFORTABLY

Our feet are the part of the body that takes the most punishment. They carry our entire weight and are constantly stabilizing the body's center of gravity. Finnamic's rockered heel design encourages gentle and low-impact heel strike and effortlessly guides the motion impulse from the lateral foot via the medial fore-foot to the big toe. The broad, flat and stable mid-section may relieve unnecessary strain on the foot while stabilizing the body. Finnamic provides optimum balance and fit.

YUMA P. 35

Rockered soles for gentle and cushioned walking

Wide and flat mid-section for secure and relaxed standing

Rockered forefoot section encourages a natural heel-to-toe rolling motion

FINNPLUS

EXTRA-WIDE FIT

The extra-wide cut gives wider feet a pleasant amount of space. The shape of the shoe and footbed is designed so that the shoe is very comfortable despite the greater amount of free space. For a perfect fit and safe walking.

OSORNO P. 65

LONG LASTING AND COMFORTABLE

Pleasant to wear thanks to padded topline

The anatomically formed, extremely comfortable footbed makes **walking comfortable**

Breathable thanks to finest leather lining

Flexible toecap eliminates pressure points

Foot motion guidance thanks to the solid heel counter

Every step is cushioned by the concave depression in the heel base and shock-absorbing materials in our outsoles

Air circulation and climate control thanks to ventilation channels in all closed hand-stitched shoes

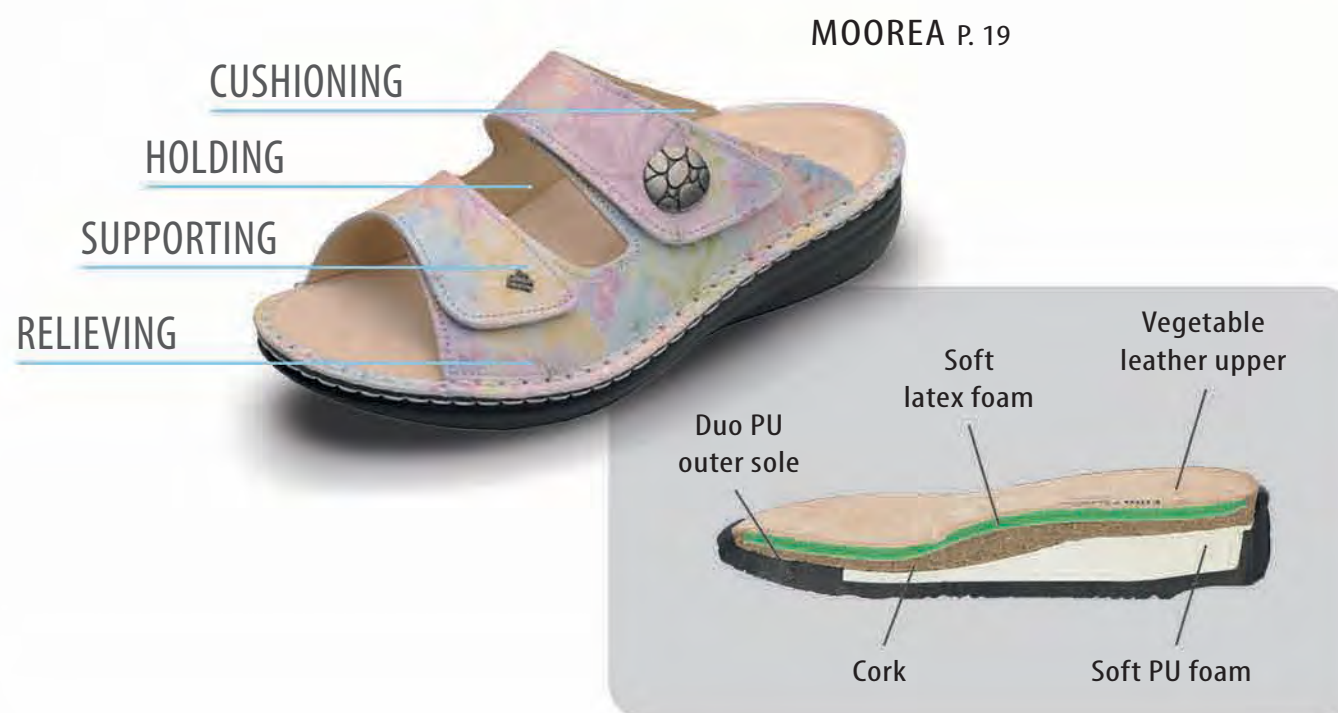

NEW

FINNMELLOW

A SUPER SOFT FEELING

The innovative technology of FinnMellow features dynamic cushioning and outstanding pressure distribution, ensuring the ultimate in comfort for both men and women. The sole is extremely flexible, elastic and highly resilient, and acts as a shock absorber. The FinnMellow soft footbed, with its stabilised cork heel cup, is modelled on the anatomy of the foot, and allows the weight of the body to be evenly distributed over the entire sole of the foot. Additionally, the padding material has a cushioning effect on the foot, which provides the joints with relief and can prevent or mitigate pain in the joints and feet. The vegetable-tanned leather of the upper ensures a healthy climate for the feet.

If required, the foot bed can be replaced with an individual orthopaedic insole.

RELIEVING

CANVEY P. 63

CERRITOS P. 43

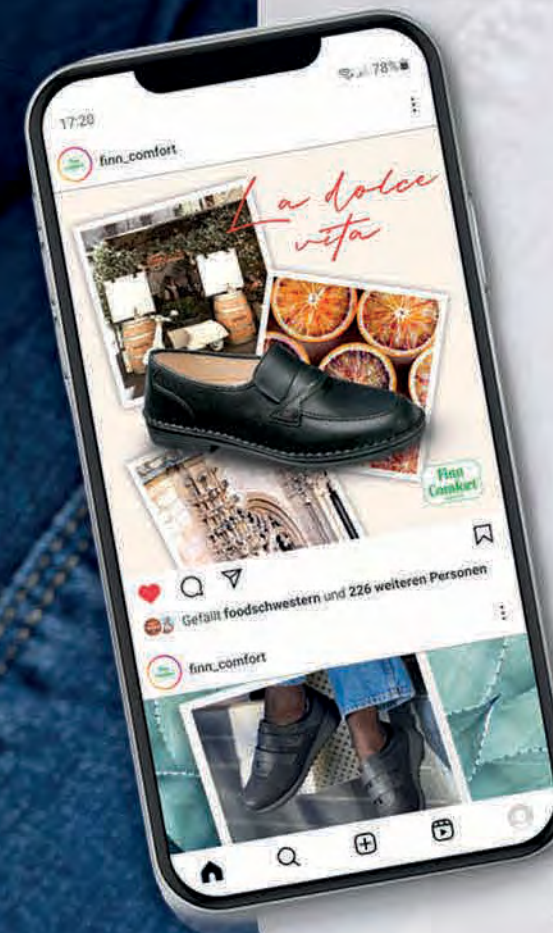

In recent years, the topic of health has shifted from a megatrend into a fundamental value for many people, with many making it their life's goal. The pandemic has increased awareness of contagious diseases worldwide. Health is being thought of more holistically, with symptoms no longer viewed in isolation from each other. Now, the focus is not only on combating diseases, but on preventing them. Especially on social media, self-care and mindfulness are being highlighted, and have found a foothold in society. Today, self-care has become a key aspect to a well-rounded approach to health.

This involves planning regular downtime, time to relax, and a conscious awareness of your own needs. The goal is to support all aspects of health, by reducing stress, staying present, and being attuned to our body and emotions. To be adequately equipped for this and to regain your footing, our feet – our most basic tools – require optimal treatment. At FinnComfort®, we've made it our mission to relieve the strain on our daily companions and improve their mobility and health. **For over 75 years, we've been working with podiatrists and experienced orthopedic shoemakers to research our feet's anatomy and function and to develop comfortable, high-quality footwear.**

Our special fits, cushioning, and materials have been proven to make our shoes beneficial to foot health. Last year, our products were officially awarded medical-grade status. In our modern factory in Haßfurt am Main, we manufacture a wide range of fashionable and classic models – covering everything from design to production and careful product control. The majority of our FinnComfort® shoes are **hand-sewn**. A stamp of quality that is appreciated by customers globally.

On our social channels, we network with customers, specialist retailers, and people with a keen interest in foot care. We also provide behind-the-scenes insights to our company and creatively stage our models. The focus is always on direct exchange with customers: Which models do they particularly like, which color have they always wanted, what is their favorite insole? Share your experience with us, we look forward to hearing from you!

Ralph Wolter
Managing Director and Co-Owner of FinnComfort®

INSOLES

The Super Comfort Footbed

The anatomically-shaped Super Comfort Footbed enhances the natural heel-to-toe rolling motion via the heel, lateral foot, medial forefoot and big toe.

The all-natural Classic Comfort Footbed may be removed overnight for airing. It can also be hand washed with mild soap and warm water (30°C / 86°F). It can be replaced with customised/orthopaedic insoles.

The Reflex Zone Massage Footbed

The reflex zone massage footbed is like a little daily spa treatment. It provides a gentle massage for the sole of your foot. The reflex insoles are available as an optional extra for many product groups. Start by wearing them for five minutes a day, then gradually increase the time to as much as an hour a day (no more).

Reflex zone footbeds are **NOT** suitable for diabetics!

The Reflex Zone Massage Footbed can be replaced again with the Super Comfort Footbed. New footbeds can be obtained at any time from our specialist retailers.

SUSTAINABLY ON THE MOVE

FinnComfort® shoes not only look good, they are also very comfortable to wear. This is partly thanks to the **natural materials** selected for the manufacturing of our shoes.

FinnComfort® only processes **high-quality upper leather from German or European tanners conscious of the environment and quality**, who guarantee water protection and the responsible use of chemicals as well as social aspects. The upper leather, which does not irritate the skin or the lungs, is guaranteed to be free from harmful preservatives (PCP), azo dyes and allergenic nickel compounds.

Renewable raw materials such as cork, jute and natural latex make up the main components of the footbeds, which offer outstanding breathability and an optimal environment for the feet with vegetable-tanned leather. The use of chemical additives is avoided as far as possible. Shoe uppers and soles are mostly bound together using water-soluble adhesives. All soles are foamed CFC-free. This allows us to ensure a high level of comfort and a positive environment for the feet.

FinnComfort® has firmly embedded **active environmental protection and sustainable further development** of the company in its corporate principles. In light of growing demand, conservation of limited natural resources is a top priority. We go to great lengths to reduce shipping and to use state-of-the-art technologies in our factory to increase our energy efficiency. Sustainable innovation does not happen spontaneously, but rather as a result of closely integrating our employees and productively collaborating with our partners.

Sustainable Partnership

Those who expect the **highest quality materials and workmanship** need partners that follow similar values.

With the **Josef Heinen Leather Factory**, FinnComfort® has one of several experienced, **reliable partners** at its side. Remarkably, the Heinen family has managed to combine **traditional craftsmanship** with a **modern, resource-effective mentality**.

Over the **past five years**, the leather factory has **reduced its energy consumption by a remarkable 15 %** and **CO₂ emissions by as much as 50 %**. This was made possible by reducing their consumption of water, chemicals and energy.

COMFORT- MADE IN GERMANY

Quality comfort shoes from FinnComfort® are made **in our factory in Haßfurt**, a small idyllic town in Lower Franconia, close to Bamberg. In spite of enormous market pressure from low-wage countries, we have managed to hold onto our home location over the last 75 years.

The number one reason: Here we can **properly ensure that the high-quality requirements** we place on diligence in our manufacturing processes are reliably met. This means we can guarantee that only high-quality, natural materials are processed, mostly **using traditional craftsmanship**. Here we can put modern **sustainability** into practice in manufacturing processes.

The second reason for our loyalty to the location is just as important: We clearly recognise our **responsibility as an employer in the region**. We safeguard and create jobs in Germany, we are committed to our region, and we will continue to manufacture in Germany in the future. This is the only way we can guarantee that we actually produce shoes that we also feel good about.

In wet conditions SympaTex® is especially comfortable. Sheer, tear-resistant SympaTex® membrane makes leather shoes watertight on the outside but breathable on the inside. This provides a pleasant foot climate.

The models Tibet and Murnau are equipped with SympaTex® Membrane.

A warm lining made of cozy lambskin or natural wool provides excellent natural warmth in winter.

The soft material adapts perfectly to your feet and forms an insulating layer of air that warms wonderfully without making your feet sweat. Because of their natural function, lambskin and wool work as a climate control system that regulates the temperature and humidity. So bring winter on!

PREVENTION

TAKE THE LOAD OFF YOUR FEET

Sensitive pressure points are unpleasant and make walking and standing difficult. Therefore, after intensive research in collaboration with doctors and orthopaedic technicians, FinnComfort® has developed the prevention shoe.

These special FinnComfort® models are made of extra-soft leather. Additionally, our prevention shoes have no pressing seams but greater width and additional cushioning in the upper and instep.

Heel counters lengthened on both sides give your foot optimal guidance and ensure a natural rolling movement.

THERAPY SHOES

Functional aftercare for a faster recovery. Therapeutic shoes can play an important role in the functional follow-up treatment of ligament injuries in the upper ankle. Despite the limited mobility of the injured foot, the goal is to mobilize it as early as possible. This will hopefully reduce the length of a hospital stay and reduce time away from work.

For versatile orthopedic care, developed with specialists.
The benefit: Reduction of rehabilitation time and improvement of treatment results.

Includes Soft Footbed
Item No. 97800 In stock sizes 4-12

97800		FINNSTABIL
Colour	Leather	Size
nuri	Nubuk	4 - 12
white/bianco	Clio/Nubuk	4 - 12

In recent years, the method of treatment for ankle injuries has evolved. This includes using therapeutic shoes which provide an alternative to traditional plaster casts. Injuries such as capsule and ligament tears, Achilles tendon damage, strains, or fractures of the metatarsal bones, are becoming more common.

Special therapeutic shoes can also provide immediate care for various states of paralysis, such as those after a stroke or a peroneus paralysis. Such footwear can be used instead of, or in addition to, paralysis ortho-sis or bandages.

Functional treatment with therapeutic shoes can help enable load bear-ing, controlled and stabilized movement and, therefore, support faster recovery. Of course, the use of therapeutic shoes should always be in consultation with the doctor treating the injury or a specialist orthopedic company.

Therapeutic footwear can also be used in the conservative treatment of fresh Capsular ligament injuries or neurological diseases. This can in-clude spastic paralysis after a stroke or during infantile cerebral palsy (Little’s disease).

After therapy has been completed The Stable shoe from FinnComfort can worn as a street shoe. All that is required is to remove the two sta-bilizers from the inside and outside.

OTHER POSSIBLE USES:

- 1 Helps when walking is impaired from severe damage to the ankle ligaments, or as part of postoperative treatment.**
Immediate care for spastic paralysis after a cerebral injury and/or in infantile cerebral palsy

2 Certain bony injuries of the ankle and the foot
e.g., malleolar fracture, stress fracture

3 Endoprotheses (particularly in the front and rear ankle area)

4 Ankle sprains

5 Ankle osteoarthritis

6 Instabilities, e.g., partial stiffening, wobbly stiffness

7 Therapy after Achilles tendon rupture, or after other operations in the Achilles tendon area, e.g., Achilles tendon lengthening
- 8 Immobilization in the tarsal and metatarsal area**

9 Joint protection in the forefoot area

10 Post-stroke condition

11 Flaccid paralysis (paresis, paralysis)

12 Spastic paralysis

13 Weak ligaments (prophylaxis against sprains)

- 1 Anatomically designed, softly cushioned vamp to protect toes and forefoot from pressure points

2 Seamless textile lining in the forefoot is antiseptic, breathable and easy-to-clean

3 Wide opening allows more room for easy foot entry
- 4 Cushioned collar and tongue for extreme comfort prevents the danger of pressure sores

5 Extended heel counters guarantee stability and heel motion guidance

6 Raised rear topline reduces heel slip-page, even with thicker insoles
- 7 Shock absorbing rocker sole encourages a softer heel strike and smooth natural gait

8 Wide and level surface for a secure and relaxed stand

9 Midsole/Optional reinforced rigid midsole also available

10 Rocker tip promotes the natural forwardrolling action

An ultra soft footbed with an antiseptic lining and stable support system is available upon request and sold separately. Thus protected and minimally stressed, wounds can heal and infections can be avoided.

FINNORTHO

189 million people worldwide live with diabete. When the disease is diagnosed too late or poorly controlled, it may lead to the possibility of developing Diabetic Foot Syndrome. Vascular and neurological abnormalities frequently damage the foot. Neuropathy, decreased blood circulation through arteries of the lower extremities, wounds that do not heal and even amputation of the foot are not uncommon in a diabetic. Well fitted and high quality extra-depth therapeutic walking shoes can help counteract this syndrome before foot ulcers occur or an amputation becomes imminent. If you suffer from repeated foot sores or have wounds increasingly difficult to heal, then FinnOrtho by FinnComfort® might be the perfect shoe for you.

With antiseptic Finntara lining in the forefoot area
